Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1906 Excerpt: . . . study, but is equally important for those graduates of the secondary schools whose future occupation does not directly require study of nature. The remaining four theses relate more specifically to German conditions, pointing out that under the present curricula biologic study is excluded from the later years of the course, in which years alone the pupil is sufficiently mature to understand what is taught of the processes of life and the influence of environment; demanding that biologic instruction should be given, say two hours weekly, throughout the nine years of the school course; and making some specific proposals whereby it is thought this can be accomplished. A committee was formed to circulate the theses and the support of about eight hundred scientists was secured. At the session of the association in Cassel in 1903 this committee made a report and proposed that the Hamburg Theses be adopted by the general session of the association. In consequence of the resolution then adopted, the general session of the association at Breslau in 1904, took up the topic, Report and Debate on the Instruction in Mathematics and the Natural Sciences in the Higher Schools. All the questions involved were referred to a commission. Two of the governing principles which it set up are the following: I. The commission wishes that instruction in the higher schools be neither one-sidedly linguistico-historical, nor one-sidedly mathematico-scientific. II. The commission recognizes mathematics and the natural sciences as of equal culture value with the languages...
